Learning Assistant- Auburn University Chemistry Department

Dean's list x5

**Name:** Jonathan Wilson

**Year:** 02

**Major:** Biomedical Sciences

**Qualifications:**

Member- Lakeview College ministry

MCG leader- Lakeview College Ministry

Orchestra- Lakeview Baptist Church

Member- AED

Dean's list x3

**Platform:** A Birthday Celebration for the College of Science and Mathematics

Welcome to the most exciting academic celebration on campus! As candidates for the president and vice president of the student council, we present our unique and vibrant party platform to govern the College of Science and Mathematics. Just like a birthday party, our approach is all about bringing joy, unity, and a sense of celebration to the academic realm.

1. Cake of Collaboration:

Our first order of business is to create a delicious Cake of Collaboration. We believe that every student, faculty member, and staff within the College of Science and Mathematics contributes a unique flavor to our academic community. By fostering collaboration, we aim to bake a cake that represents the diversity and richness of ideas within our college. Through shared events and merchandise, we will ensure that everyone gets a slice of success.

2. Balloons of Innovation:

No birthday party is complete without balloons, and our College of Science and Mathematics is no exception. We pledge to inflate the Balloons of Innovation, lifting our academic environment to new heights. These balloons symbolize our commitment to fostering a culture of creativity and pushing the boundaries of knowledge.

3. Streamers of Support:

Our college family deserves unwavering support, just like the streamers that adorn a festive space. We promise to weave the Streamers of Support, creating a safety net for students facing academic challenges. No one should feel like they're navigating the party alone – we're all in this together.

4. Pin the Tail on the Vision:

Vision is crucial for any successful party, and we are ready to play "Pin the Tail on the Vision." As leaders, we will work collaboratively with students, faculty, and administrators to set clear goals and a visionary roadmap for the future of the College of Science and Mathematics. Our vision involves modernizing infrastructure and ensuring that our college remains at the forefront of scientific and mathematical advancements.
