Party Platform

As members of the SGA Senate, we would aim to change two things within the Samuel Ginn College of Engineering.

Firstly, we would like to better utilize the Student Activity Fee to host more events for Auburn engineering students. Currently, we already have a few events hosted by the college of engineering for students, but by utilizing extra money from the student activity fee, we could host more events, such as distributing Chick-Fil-A chicken biscuits for midterms. We would garner this funding by working with the SGA senate to grant us the money for these events.

Secondly, we would like to streamline the process for student organizations to order Engineering merchandise. Currently, creating and producing merchandise for the college of Engineering is a long and timely process. We would like to streamline this process by clearly laying out guidelines for merchandise online. We would also create an online portal for the officers of engineering student clubs and organizations to be able to expedite the process of designing and purchasing this merchandise.

Finally, we would like to make the Engineering Executive Student council meetings public to all students. If students wish, they should be able to voice their concerns at an open forum during the meeting. As it stands now, students must voice their opinions through channels other than these meetings, but with an open forum during the meetings, students would be able to have their voices heard in a much simpler fashion.

Concourse Plan

We plan to reserve a table to put in front of the Brown Kopel Engineering Building. We will have the table manned from 8am-2pm, and we will distribute chicken biscuits or doughnuts and our pins, as long as supplies last. At 2pm, we will pack up our supplies, return our table, and finish campaigning. If we feel that it is necessary, we will continue to campaign after 2pm and pack up our supplies later in the day. We do not plan on campaigning before Friday.
