**Year:** 02

**Major:** Chemical Engineering

**Position Sought:** Vice President

**Qualifications:**

Chi Omega Chaplain

Lambda Sigma Honors Society

Society of Women Engineers

Onward Campus Ministries

Grace Kids Volunteer

**Platform:**

Our platform, Engineering Excellence, is dedicated to improving the connection between engineering students and the wide range of resources available to them within the college. For years, Auburn has been committed to offering the best student-centered engineering experience in the country, and our platform aims to advance that goal by increasing awareness of these valuable resources. We will provide students with easy access to tools, support, and opportunities that will help them thrive academically, professionally, and personally throughout their engineering journey.

Engineering students often face challenges navigating the many opportunities offered, from research programs and career services to academic tutoring and student organizations. Through our platform, we hope to centralize these resources, making it easier for students to find information about various services, programs, and events that align with their goals and needs. We hope to highlight resources such as the Career Development and Corporate Relations Office, Peer Tutoring, student organizations like Engineers Without Borders, Society of Women Engineers, and major-specific clubs and gatherings, and, lastly, mental health and wellness resources. All this is crucial in ensuring that engineering students can thrive both inside and outside the classroom despite the difficult workload.

Our goal is to connect engineering students with mentors and opportunities that will enhance their experience and support retention within the College of Engineering. While Auburn's College of Engineering offers incredible resources, navigating them can sometimes feel overwhelming. By implementing strategies and policies that will streamline access to these resources, we want to ensure that students have the guidance and support they need to succeed throughout their journey.
